

# Making an Eco Stove

---

Ings Primary School

24 June 2014

# Cooking the traditional way in Sierra Leone

---

## Why is this a problem?

---

- Smoke
- Unsafe
- Deforestation

# Did you know?

---

Smoke from cooking fires kills more than one and a half million people every year; one person every 20 seconds

Can this be the  
solution?

---

If it is why is it  
better than the  
traditional 3  
stone fire?

# A solution – the eco stove

---

Using half as much wood so cheaper

Less smoke and soot produced

More heat produced so cooking is faster

Fewer trees need to be cut down

Money saved can be spent on other urgent things

More time to make money by doing other things
